# Wheaton Police Department to Begin Using Automated License Plate Readers (ALPRs)

**T**he Wheaton Police Department will soon begin using Automated License Plate Readers (ALPRs) as a tool to help identify vehicles driven by people suspected of criminal activity and locate vehicles associated with missing persons, Amber Alerts or individuals in crisis, while protecting the privacy and rights of all people.

ALPRs are high-resolution cameras that take a picture of the back of vehicles as they pass through the field of view. The image captures the vehicle make & color, license plate and time the vehicle passed by the camera. It DOES NOT capture information about the occupants, track people, measure

vehicle speed, or enforce traffic/parking violations. The cameras are not capable of recording video or facial recognition, and the technology is not connected to personal identifying information.

## **Why is the Police Department using Automated License Plate Readers (ALPRs)?**

Seventy percent of all crimes committed involve an automobile. License plate numbers give law enforcement objective, actionable leads needed to solve and prevent crimes. ALPRs will be used as a resource for a retroactive search to help solve crimes after they have occurred. They will also be used to help locate individuals in emergency situations, such as finding vehicles

---

*ALPRs will serve as another tool supporting the City Council's Community Safety Strategic Priority, leveraging technology to prioritize the safety and welfare of our community.*

---

associated with missing and endangered persons.

## **Data Security & Protecting Your Privacy**

The City of Wheaton owns the images associated with ALPRs and the data is fully encrypted. None of the data collected by the ALPRs will be sold or shared to any third-party entities outside of law enforcement or with federal immigration agencies. All data collected will be deleted after 30 days if the registration

is not part of an active investigation.

The Wheaton Police Department has a strict department order outlining officers' retrieval of data from the system and its subsequent application. All data retrieval activity is recorded and can be internally audited.

ALPRs will serve as another tool supporting the City Council's Community Safety Strategic Priority, leveraging technology to prioritize the safety and welfare of our community.

## Creekside Bridge Replacement Project Underway

Based upon its age, the Creekside Drive bridge over Spring Brook Creek (located on Creekside Drive between Spring Green Drive and Gone Away Lane) is reaching the end of its useful life and is due for replacement. To continue enhancing the community's infrastructure, the Wheaton City Council recently authorized Herlihy Mid-Continent Company to replace the bridge. Work is expected to finish by Nov. 1, 2023, barring unforeseen circumstances. Temporary detour signs will direct traffic around the construction area using Spring Green Drive and Stonebridge Trail. The City and Herlihy Mid-Continent Company will provide additional notices to residents in the construction zone with information on where to park while work is in progress. The City of Wheaton and District 200 are working together to plan for affected school traffic and bus routes, and nearby schools will communicate any necessary changes to affected school communities. For more information, visit [the City's website](http://theCity's website).

## Back-to-School Safety Awareness Month

**A**s many students head back to school this month, the Illinois Emergency Management Agency (IEMA) recommends that families review their own emergency preparedness plans and school safety plans. - Make a family communications plan

- Update your emergency contact information on file at your child's school
- Learn more about school plans for disaster or emergency reunification
- Encourage young students to take emergency drills seriously and ask questions to help them remember what to do
